Ramón Bigas. 1975
Seating

CE

Designed by Ramón Bigas, former president of the FAD and a standard-bearer of the second generation Barcelona designers; a group of intuitive, carefree, yet serious and pragmatic professionals. A metal-framed chair with a white or natural wicker seat and backrest. Its structure makes it easily movable and stackable. The backrest, straight at the bottom and curved at the top, supports the back and is soft on the kidneys, allowing for extensive periods of comfortable seating. Below the seat, a metal bar is arranged in the shape of an X, bearing the user's weight structurally as the frame flexes. A wonderful fusion of elements for indoor and outdoor settings.

General description:
